

# Who We Are ?

---

We are a collective of young architects driven by an uncompromising passion for design and the power of built space.

Architecture, for us, is not simply a service—it is an exploration, a responsibility, and an ongoing pursuit of meaning.

We are endlessly curious about how light enters a room, how materials weather with time, and how spatial clarity can transform everyday life.

Bold in ideas yet grounded in context, we question conventions and embrace experimentation while remaining attentive to function and detail.

***Our youth fuels our energy;  
our discipline anchors our vision.***

Every project becomes a dialogue between emotion and logic, poetry and precision—resulting in architecture that is thoughtful, enduring, and deeply human.

# What We Do?

We explore architecture and interiors through a process of observation, experimentation, and careful detailing—creating spaces that respond to context, climate, and the everyday lives of the people who use them.

# Residence Designs

We design residences as thoughtful responses to the people who inhabit them, creating spaces that are functional and deeply personal. Our approach is guided by lifestyle, context, and climate, expressed through careful planning, light, and materiality. We develop 3D visualizations to clearly communicate design intent, resulting in homes that feel intuitive, enduring, and connected to everyday life.

# Landscape

Landscape is approached as an integral part of the overall spatial experience rather than an afterthought. By carefully shaping open spaces, circulation, planting, and natural elements, we create outdoor environments that complement the architecture, respond to the climate, and offer calm, functional spaces for people to gather, move, and connect with nature.

# Layouts

---

We explore layout planning as an opportunity to shape communities and meaningful living environments. Our approach focuses on thoughtful site planning, efficient circulation, and the careful integration of open spaces, ensuring that each development responds sensitively to its context while creating a balanced and livable environment.

# Apartments

---

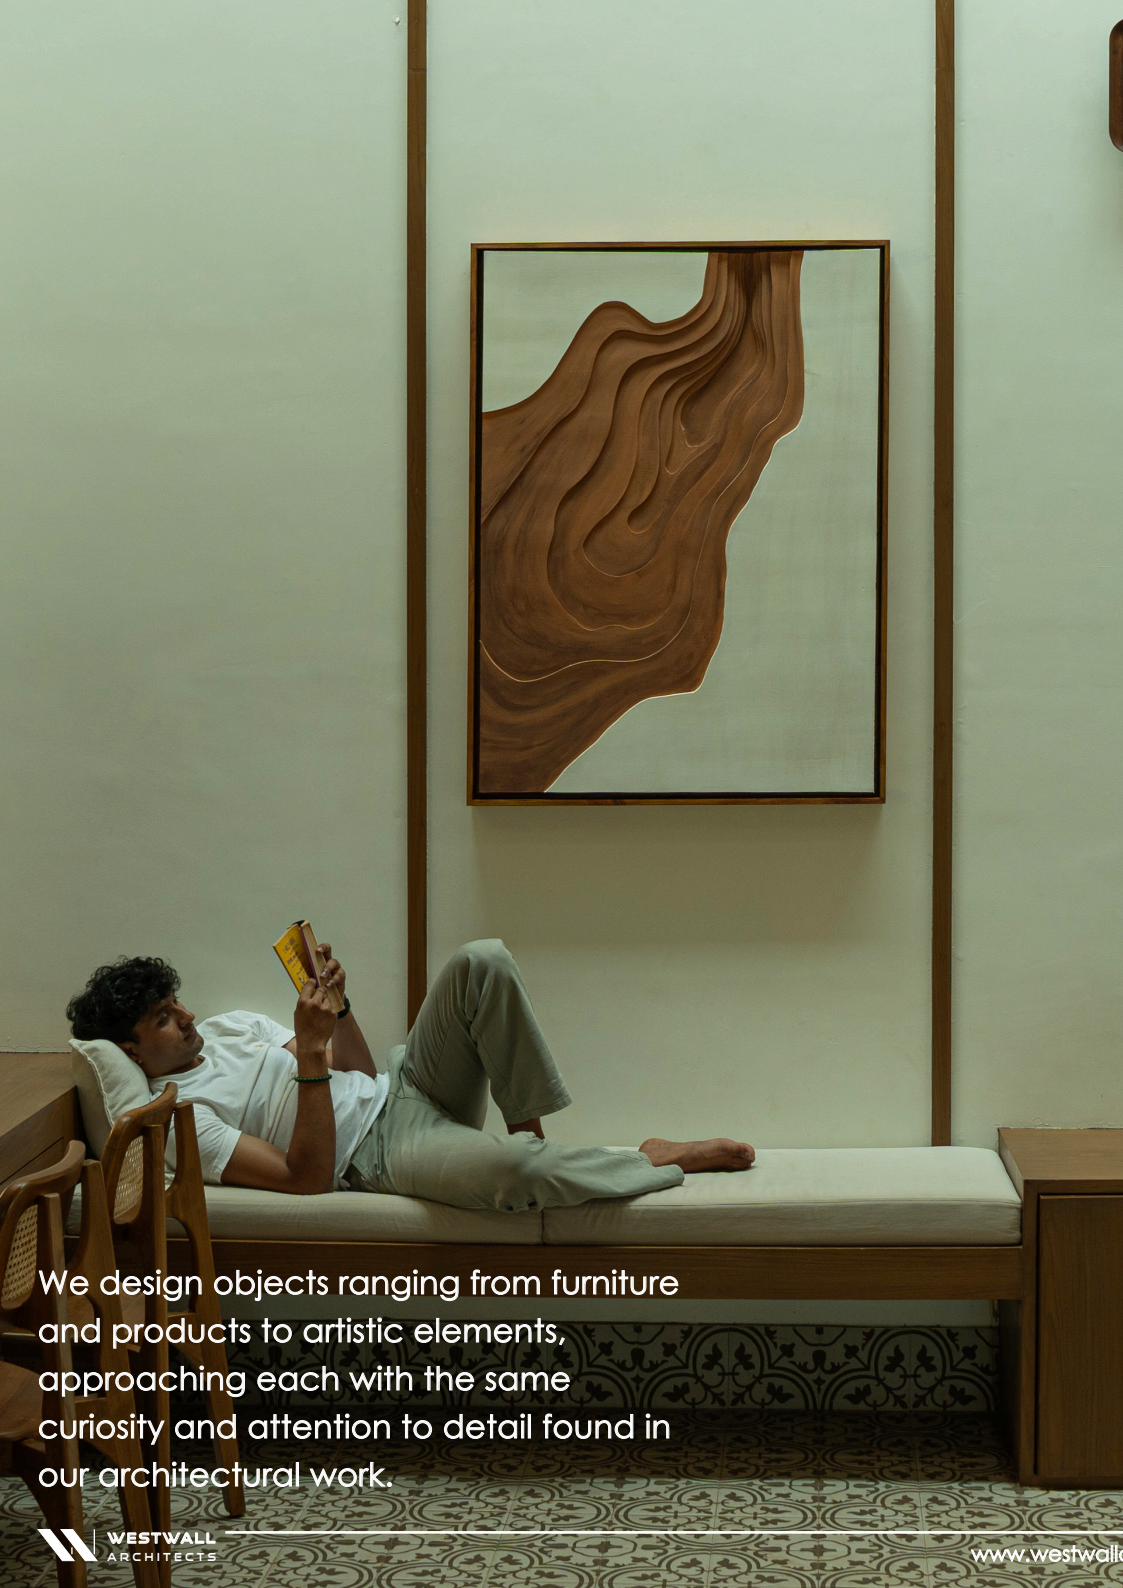

# Interiors

Our interior projects focus on crafting spaces that are both functional and expressive of the people who inhabit them. Through careful attention to spatial flow, material palette, lighting, and detail, we create interiors that feel cohesive, comfortable, and thoughtfully connected to the architecture around them.

We design objects ranging from furniture and products to artistic elements, approaching each with the same curiosity and attention to detail found in our architectural work.

# House of Wings

---

Project area- 3500 sq ft  
Site area- 20 cents  
Location- Sullia, Karnataka

Project area- 3500 sq ft  
Site area- 25 cents  
Location- Vittla, Karnataka

# The Backyard

Project area- 1800 sq ft  
Site area- 18 cents  
Location- Puttur, Karnataka

We Design,

Human-centric spaces  
that enhance daily life

We Design,

Contextual design that responds to climate,  
culture, and site conditions

**We deliver the spaces  
your story deserves**
